TEST -2

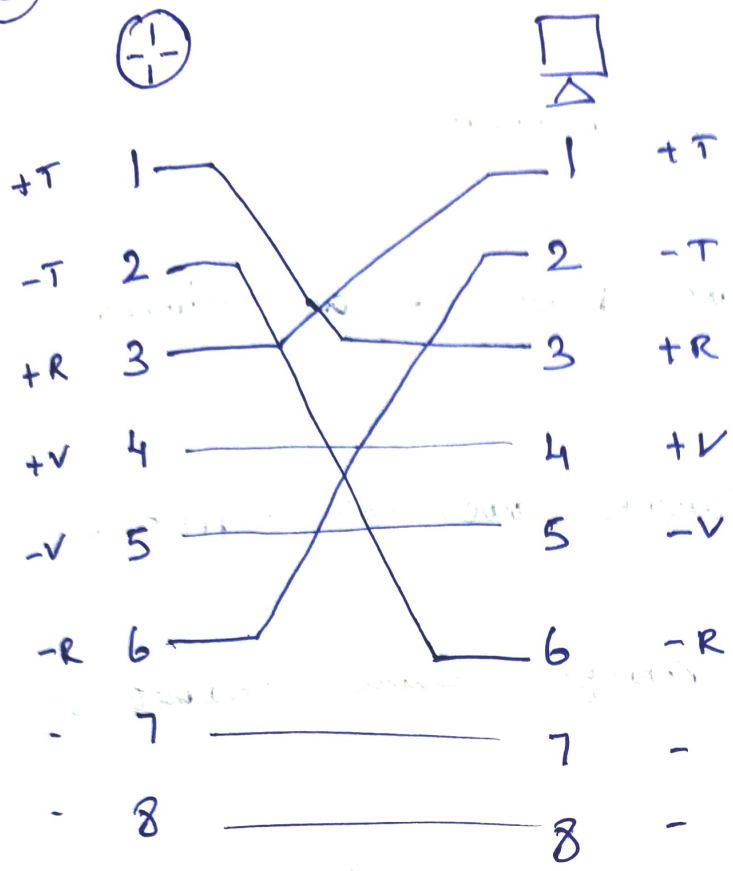

① TYPES OF MEDIUM

② SWITCH - 8 PINS

+T	1
-T	2
+R	3
+V	4
-V	5
-R	6
-	7
-	8

(3)

CROSS - CABLE (SIMILAR DEVICE)

(4)

AUTO MDIX

AUTOMATIC MEDIUM DEPENDENT INTERFACE CROSS OVER

⇒ Automatically detects the type of Ethernet Connection.

⇒ Don't have to manually choose wheather Straight or Crossover Cable.

Ex

PC ⇔ Switch (Even cable it's manually selected Auto MDIX adjust the Connection)

(5) PoE Injector

PoE → Power over Ethernet

→ PoE Injector adds power to an ethernet cable.

→ Useful when Switch does not support PoE

→ Data + Power through same ethernet cable.

Ex

Switch → PoE Injector → IP camera

(6) PoE Switch

→ Provides data + Power through same ethernet cable.

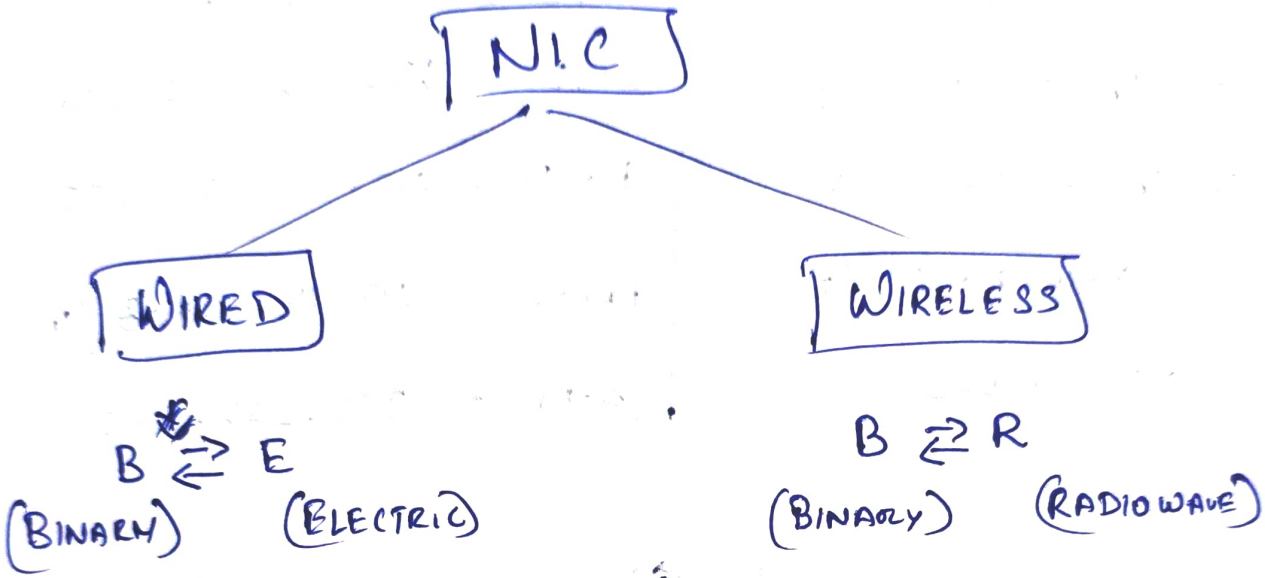

→ No separate power adapter required.

Ex

PoE switch → E.C → IP camera.

(7) TYPES OF NIC

NIC → NETWORK INTERFACE CARD

FUNCTION

- → Provides network Connectivity
- → Convert binary signal to Electrical signal
- → It has Unique MAC address.
